Previous versions .....	4

## Release Notes

### 1. Sewing

#### 1.1. Negative presser foot pressure (b77, b79)

The presser foot pressure can now be adjusted to -10. This lifts the presser foot up to 3mm from the stitch plate. This is specially meant for use with the new ruler foot. See also 1.2 Sewing setting added.

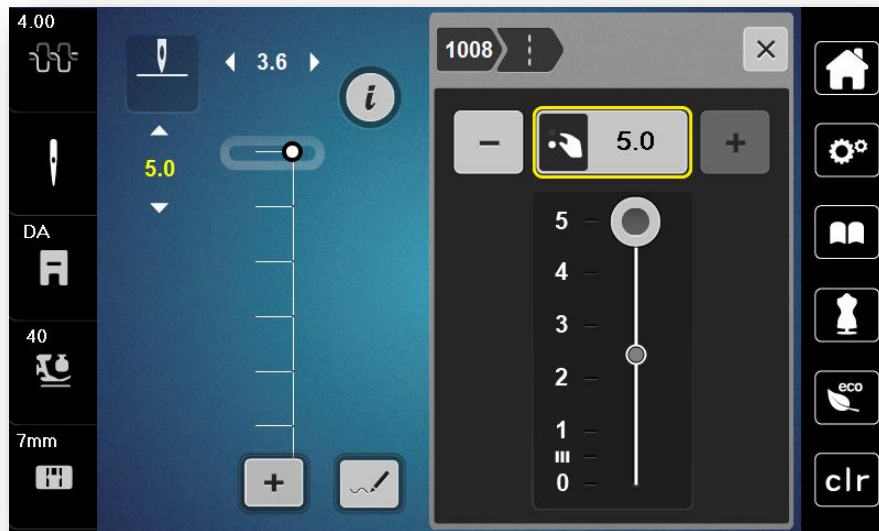

#### 1.2. Sewing setting added

The height of the sewing foot lift when sewing stops with the needle down can be limited to 2mm. This prevents the needle holder from colliding with the new ruler foot when the needle is down, and the hovering height is set higher than 2mm.

## 1.3. Maximum stitch length of Quilt stitches is now 5.0

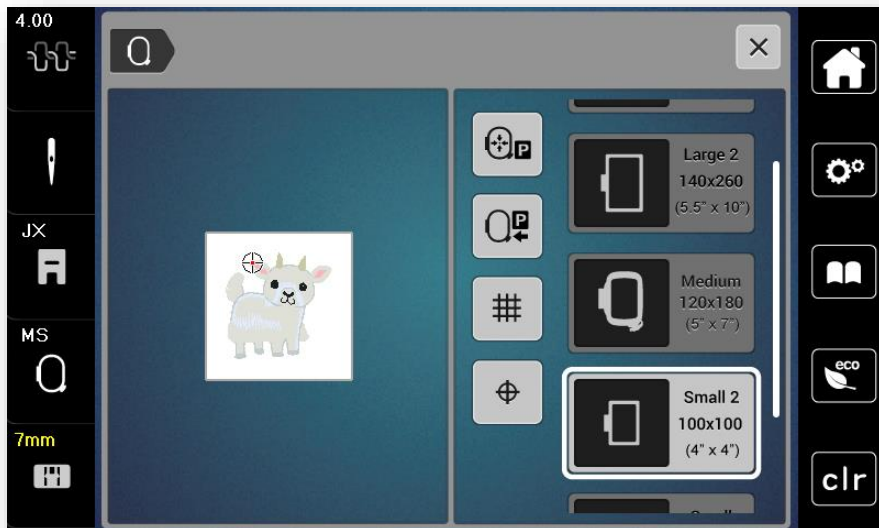

Stitch length of Quilt stitches (1001 – 1035) can now be adjusted to 5.0

## 2. Embroidery

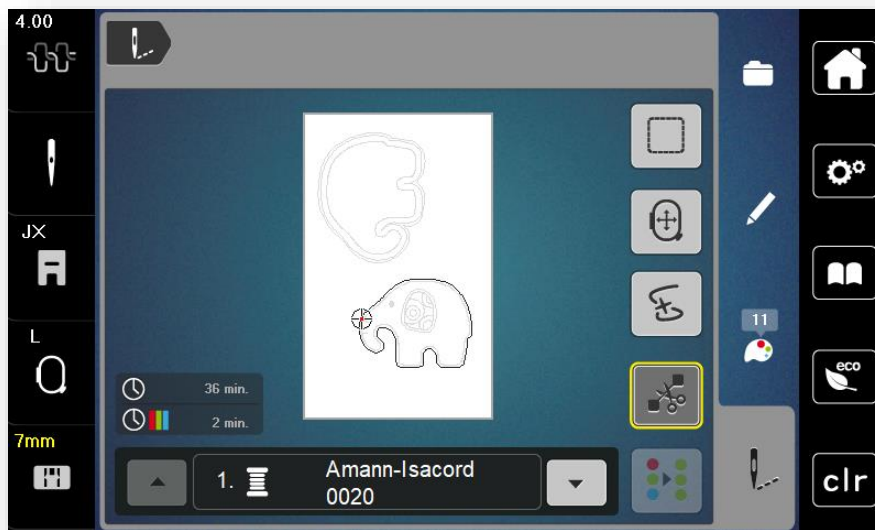

### 2.1. Three new hoop sizes (b70, b79)

Three new hoop sizes have been added. The new magnetic DIME/bernette hoops are now available as optional accessories.

## 2.2. Embroidery of CutWork/Multi-color embroidery designs (b70, b79)

With CutWork/Multi-color embroidery designs, the CutWork colors are no longer embroidered if the function " Multi-colored embroidery motif on/off" was previously activated.
