

## Cutting with the CutWork Tool

This pattern without a stabilizing stitch works well on firmer fabrics that don't curl or stretch.

Open the pattern «Bernina\_001\_flower»

Now insert the CutWork Tool instead of the needle. Very important: The knife must be in position 1. If not, rotate the knife to that position

Once position 1 is finished cutting, simply turn the knife and cut positions 2 through 4.

For more information about the CutWork tool, see the video on the bernette YouTube channel: [b70 DECO + b79 Tutorial – Embroidering with the CutWork Tool](#)
