

Cutting with the CutWork Tool

Iron the Vliesofix onto the appliqué material. Add an additional layer of tearaway stabilizer and insert the material together with the backing into the large embroidery hoop. In order to achieve the best stability, it is best to use a heavier cut-away stabilizer.

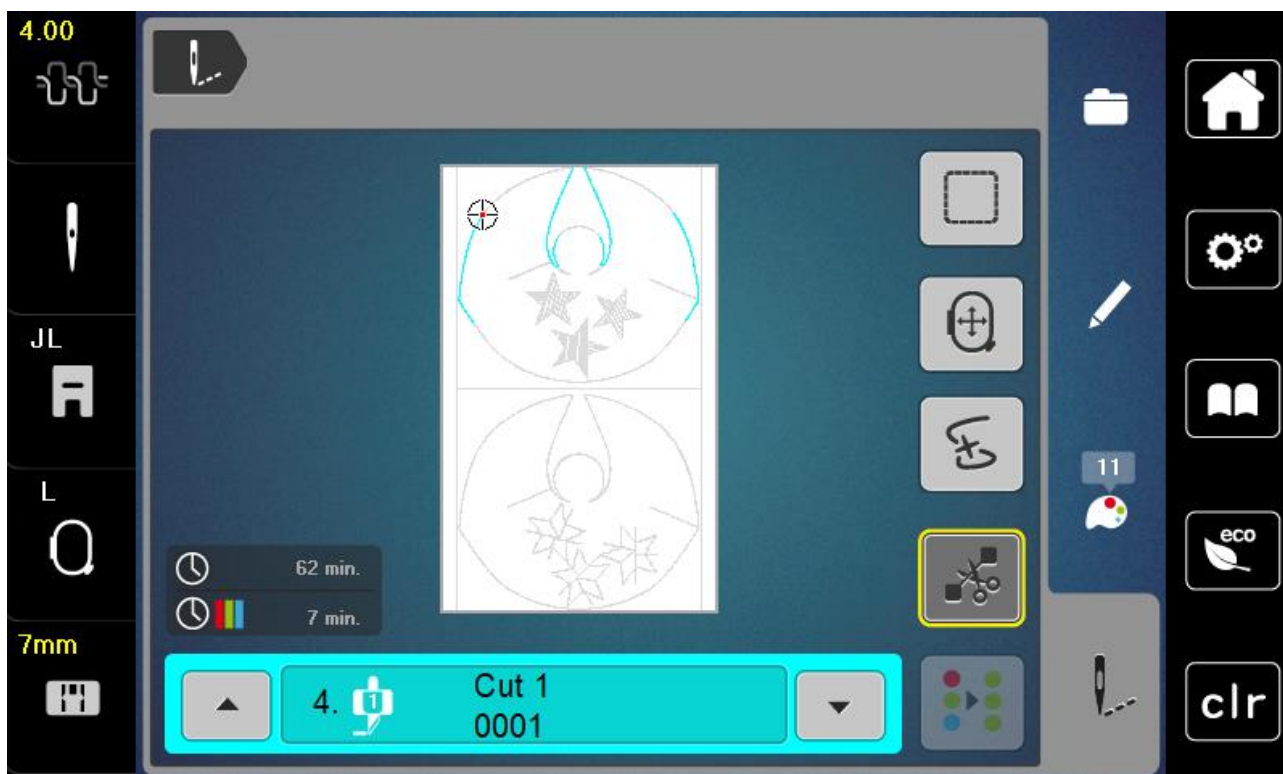

Open design «7530_Angel_143x260».

First embroider the borders and stars.

Embroider as usual.

Then the shapes are cut out.

Now insert the CutWork Tool where the needle goes. Very important: The knife must be in position 1. If it is not, turn the knife to this position.

As soon as position 1 has been cut, simply turn the knife and cut positions 2 to 4. This is repeated for the second angel.

Once the angels have been cut out, bend these and connect the incisions.
