

Cutting with the CutWork Tool

Iron the Vliesofix onto the appliqué material. Add an additional layer of tearaway stabilizer and insert the material together with the backing into the large embroidery hoop. In order to achieve the best stability, it is best to use a heavier cut-away stabilizer.

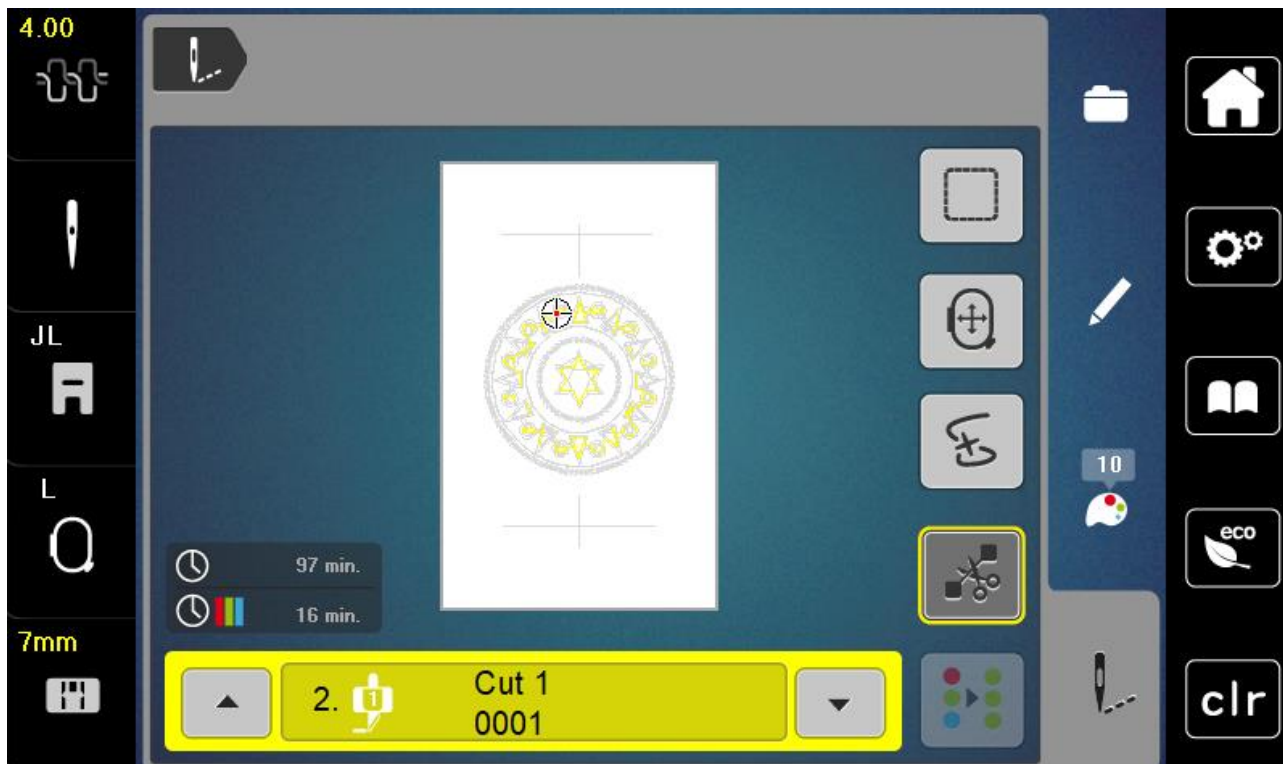

Open design «Circle».

First embroider the stabilizing run on the fabric.

Embroider as usual.

After the stabilizing run, the cutting starts.

Now insert the CutWork Tool where the needle goes. Very important: The knife must be in position 1. If it is not, turn the knife to this position.

As soon as position 1 has been cut, simply turn the knife and cut positions 2 to 4.

Now continue to embroider the rest of the design as usual.
