

Cutting with the CutWork Tool

This pattern with a stabilizing stitch also works well on thinner fabrics with a stabilizer.

Iron the Vliesofix onto the fabric. Add an additional layer of tearaway stabilizer and insert the material together with the backing into the large embroidery hoop. In order to achieve the best stability, it is best to use a heavier cut-away stabilizer.

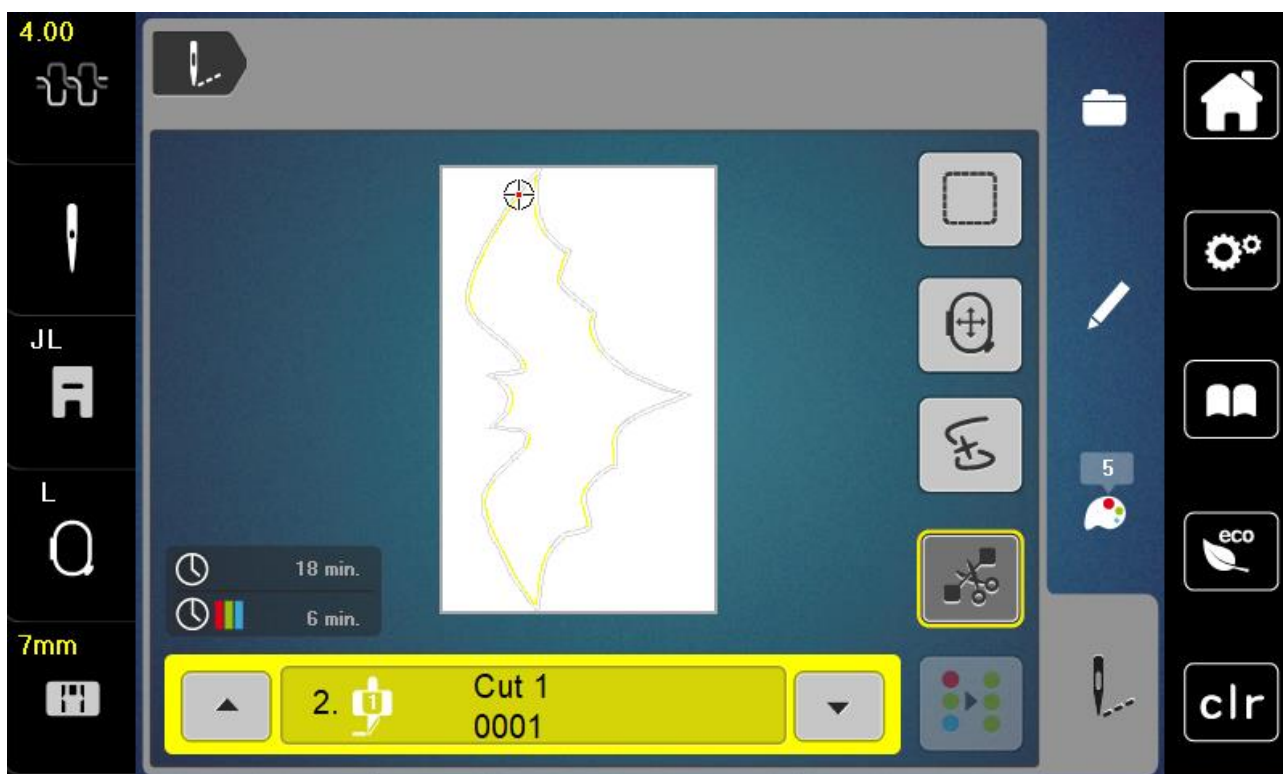

Open one of the patterns «S1537_CW_Bat_132x260», «S1537_CW_Big_Pumpkin_141x260» or «S1537_CW_Ghoost_147x260».

First embroider the stabilizing run on the fabric with stabilizer

Now insert the CutWork Tool instead of the needle. Very important: The knife must be in position 1. If not, rotate the knife to that position

Once position 1 is finished cutting, simply turn the knife and cut positions 2 through 4.

For more information about the CutWork tool, see the video on the bernette YouTube channel: [b70 DECO + b79 Tutorial – Embroidering with the CutWork Tool](#)
